

CYBER CRIME PREVENTION

Scams, including fraudulent emails, are a growing threat, and the property industry is not immune to such risks. At Safety Bay Settlements, safety is not just in our name because of where we operate, but also because we prioritise the safety of our clients. While we have strong security measures in place, including advanced systems to protect your data, your active involvement in fraud prevention is equally as essential. By staying alert, informing us immediately of suspicious communication, and following our recommended procedures, you play a vital role in ensuring the integrity and security of our shared transactions.

STOP Never transfer money without speaking to your conveyancer first.

Scammers may send emails or make calls, pretending to be from organisations you know and trust such as your settlement agent, bank, government or a fraud service.

THINK Ask yourself could the message or call be fake?

Always verify our contact details or those of government entities against the information on our official website or Google. If uncertain, decline, hang up, or delete.

ACT Act quickly if something doesn't feel right

If anything seems off or unusual, get in touch with us right away. Acting fast is key if something feels wrong.
